

Asset Management Made Easy

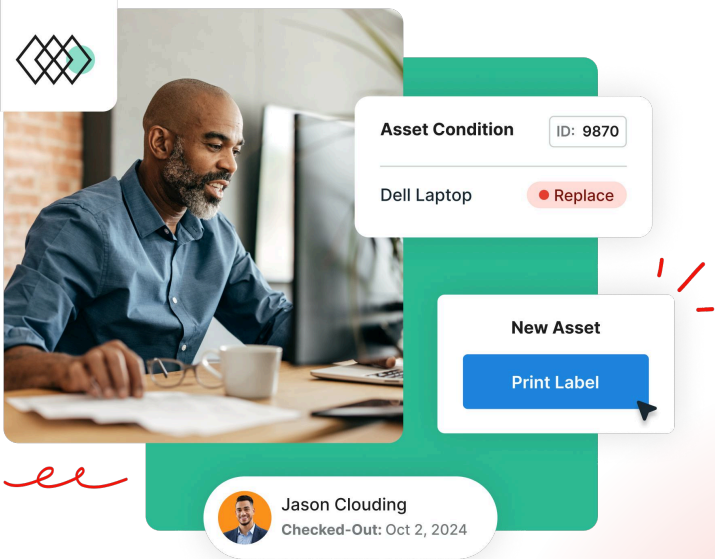

Capture, Track, Assess, & Assign Fixed Asset Inventory

Easily automate asset tracking, user assignments, and condition reporting for high-value or mission-critical items with mobile scanning options that fit your needs and budget.

RedBeam adapts to your unique operational workflows and ensures your assets are where you need them – and in the right condition – to support your business.

As a SaaS platform with modern, flexible APIs, RedBeam gets your team up and running in less than a day – with minimal setup or support required.

→ RedBeam is **Asset Tracking Made Easy.**™

Simplify Your Asset Tracking Workflow

| 1 Label | 2 Scan | 3 Track |

| <ul style="list-style-type: none">• Use (existing or new) asset labels with 1D, 2D, and QR code formats• Create your own user-defined code formats• Print on anything from low-cost, office-grade Avery labels to commercial-grade polyester labels• Leverage advanced Zebra RFID label printing and encoding, including Silverline 'on metal' tags | <ul style="list-style-type: none">• Scan labels to tag assets• Use your mobile device to add or update asset details like:<ul style="list-style-type: none">- location- condition- value- maintenance status- photo images- custom fields• Conduct physical inventory• Enable user check-in/check-out functionality | <ul style="list-style-type: none">• Get accurate, real-time asset location visibility• Monitor condition and maintenance requirements• View asset-to-user assignment history and audit trails• Generate comprehensive reports, notifications, and API-based status updates |

RedBeam Scales As Your Needs Change

The RedBeam platform is powerful enough to serve as your system of record or act as the mobile data capture layer that integrates with your ERP. Start with simple QR code imaging on mobile devices, and scale up to industrial-grade scanning or RFID solutions at any time.

RedBeam supports accounting and regulatory asset inventory reporting to keep your business on track – even as requirements evolve.

Key Features

- ✓ Modern, secure, multi-tenant SaaS platform (SOC 2 Type II compliant)
- ✓ Scalable to support organizations of any size
- ✓ Best-in-class mobile inventory automation, aligned with accounting best practices
- ✓ Flexible labeling options: 1D/2D barcodes, QR codes, RFID
- ✓ Manage inventory across multiple locations and users, with full process visibility
- ✓ Easy asset assignment and check-in/check-out processes
- ✓ Offline support for all mobile functions, even without network access

Key Benefits

- ✓ Real-time visibility into inventory quantity, location, condition, and value
- ✓ Simplified, mobile-friendly workflows usable by any team member
- ✓ Improved accountability for tracking condition at the user level
- ✓ Full audit trail and compliance reporting
- ✓ Fast, intuitive setup – usable within hours for immediate business impact
